- Punjabi

PROFILE

Beginner Front-End Developer with 6 months of hands-on industry experience, specializing in building scalable and high-performance web applications using **Next.js**, **React.js**, **Node.js**, and **Express.js**. Proficient in modern UI frameworks like **Tailwind CSS** and **Bootstrap**. Proven ability to deliver responsive, dynamic, and cross- platform solutions across e-commerce, dashboards, and internal tools. Strong in REST API development, frontend/backend integration, and optimizing application performance.

WORK EXPERIENCE

Brain Art Marketing OCT 2025 - MAR 2026
Front-End Developer
I'm working as Front-End Developer Intern developed secure, scalable web applications, including complete Web app for a local fast-food Company. Skilled in **Next.js**, **Node.js** and **MongoDB**. with expertise in managing products and orders. Currently working on AI-Based CQI Process Tool using **Python** (**Django**), **Tailwind**, and **SQLite**, with expertise in User management, RBAC-based security, Dynamic forms generation and submission and Report Generation.

Remote May 2024 - June 2025
Chef On Call
Online Chef Booking Platform Developing a full-stack service-based web application that connects customers with verified chefs for home dining, events, and parties. Designed a dual-interface system where users can register as clients or chefs. Architecting a scalable solution using Next.js and Tailwind CSS for the frontend and Node.js/Express.js with MongoDB on the backend. Focused on creating a seamless user experience with clear workflows and responsive mobile support.

Original License Plate Detection System (OLPDS)

Developed a real-time AI-based license plate recognition system for law enforcement, utilizing YOLOv5 for detection and Tesseract OCR for character extraction. Created a secure web application with Next.js, Node.js, Express.js, and MongoDB, featuring a clean UI/UX and role-based access. The responsive interface, designed with Tailwind CSS, emphasizes clarity and speed. The backend efficiently manages image processing, secure storage, API routing, and user management, ensuring fast detection speeds and high accuracy.
